THE NEW JAYLOR 6000 SERIES: TRUE TMR, ZERO COMPROMISE

6425 SINGLE AUGER MIXER

Introducing the Jaylor 6000 Series Vertical Mixers. Featuring our patented Square-Cut Auger, trusted worldwide for its efficient bale processing and uniform rations in less time, with less horsepower than traditional round auger mixers.

For over 30 years, Jaylor mixers have been built to deliver True TMR: every bite the same, no sorting, healthier herds, better production. With the new 6000 Series, we've made the Jaylor TMR mixer even better, with a wide range of operator-focused upgrades, engineered to give you the best way to feed.

UPGRADED DISCHARGE CONVEYOR SYSTEM: BUILT TOUGH FOR RELIABILITY

SHORT WING CONVEYOR

- Built with galvanized steel, HDPE plastic and simple yet high quality components, this conveyor is built to last for years without worrying about rust or expensive repairs.
- Flexible spring shields on the sides of the conveyor automatically tension to hold feed, and wipers clear the conveyor slats so every bit of feed ends up in the bunk.
- A clear line of sight from the tractor cab to easily see the door and conveyor when unloading feed.
- Top-mount lift system for increased clearance under the conveyor so you can get even tighter to the bunk.

LONG WING CONVEYOR

NEW ALL-TERRAIN TMR MIXERS

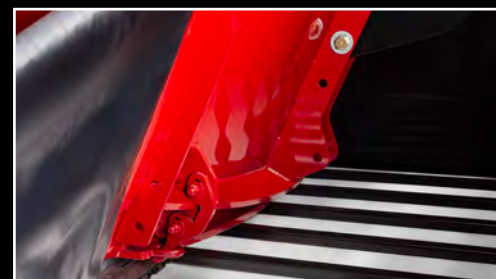

The new 6425 Single Auger and 6850 Twin Auger All-Terrain models are designed to handle tough terrain and keep your operation moving. With more ground clearance, higher flotation, and the confidence to pull through thick mud and snow without hesitation.

FLOTATION RADIALS

50% LARGER VIEWING WINDOW

SEAL-LOCK DOOR

GALVANIZED LADDER

MORE AXLE & TIRE OPTIONS

OPERATOR-FOCUSED UPGRADES

You asked and we delivered with upgrades that make feeding easier, safer, and more efficient. Every upgrade was designed based on your feedback, turning real-world needs into practical improvements.

With a 50% larger viewing window, our patent-pending Seal-Lock Door, a galvanized ladder, a new hood with hose storage that allows for a clear view while unloading and more axle and tire options, every detail was built with you, the operator, in mind.
